

## The Extremely Large Databases Conference at Asia Renmin University of China, Beijing, China June 22-23, 2012

This conference will bring together people with highly demanding data challenges, and researchers and solution providers who are developing systems to address such challenges.

The conference will facilitate discussions on:

- The state of the art data handling technologies on extremely large datasets;
- Practical use cases of current and anticipated data challenges;
- Lessons and innovations on building extremely large databases;
- Trends and strategies for surmounting current hurdles.

The conference will provide a meeting place for database researchers, for businesses with advanced solutions, and for people from many research disciplines, industries and organizations who need to urgently address real data challenges.

The conference program will include invited talks representing database-intensive scientific and industrial applications, database research and DBMS vendors. The conference will also invite proposals for lightning talks (allocated five minutes per talk), followed by poster discussions. If you are interested in giving a lightning talk, please send an abstract with less than 500 words to [lightningtalks@xldb-asia.org](mailto:lightningtalks@xldb-asia.org) before April 30, 2012.
